

IN THE SPECIFICATION

Please amend the specification as follows:

Please replace the paragraph beginning at page 19, line 6, with the following rewritten paragraph as follows:

-- Fig. 10 shows a pair management table 1001. In the pair management table 1001, a column of "COPY SOURCE DEVICE" indicates storage devices (10 or 20) to which those of the logical volumes of copy sources belong (hereafter referred to as "primary volumes"). A column of "~~COPY DESTINATION~~ DESTINATION DEVICE" indicates storage devices (10 or 20) to which those of the logical volumes of copy destinations belong (hereafter referred to as "auxiliary volumes"). Also, a column of "PRIMARY LUN" indicates LUNs of the corresponding primary volumes, and a column of "AUXILIARY LUN" indicates LUNs of the corresponding auxiliary volumes. Each correspondence between a primary volume and an auxiliary volume is called a "pair". Those of the logical volumes 209 for storing journals (to be described below) are assigned to the primary volumes and auxiliary volumes. A column of "PRIMARY JOURNAL LUN" sets LUNs of the logical volumes 209 of the journals assigned for the primary volumes (hereafter referred to as "primary journals"). A column of "AUXILIARY JOURNAL LUN" sets LUNs of the logical volumes 209 of the journals assigned to the auxiliary volumes (hereafter referred to as "auxiliary journals"). --
